Remarks

Their Hunting Grounds are about the Chilcotin Mountains where they say Beaver is abundant and the Lake upon which they reside, supplies the Water forming the North Branch of the West Road River. Sir Alexander MacKenzie places the Latitude at 53.4.32. North, and got to the North West Coast in 10 days Lat. 52.21 N. immediately to the Southward of the Princess Royal Islands.

The West Road & Rough Poplar River Indians hunt with the Fluze Kuz, & on the West Banks of Frasers River the greater proportion of the Tribe, generally hunt upon the range of Mountains to the North East (where Quesnels River takes its rise) and Bear Lake where from report Beaver was formerly numerous—but subsequently nearly destroyed by the Iroquois—they are tolerable good hunters.

Their Lands are poor—a few hunt on the West side of Frasers River, but do not at any time venture far—fearful of meeting with Chilkotins—the rest of the Tribe go the range of Mountains towards the North East—at best they are no Hunters—and considered the most troublesome Indians on Frasers River—their Limits are very circumscribed—and of course encroach upon the Neighbouring Lands. They are the last "Carriers" on the River.

They obtain a few Beaver, some on the South Banks of Frasers River, and others go in a North Easterly direction towards a Chain of Lakes and Mountains bordering on Thompsons River—their united labours for 2 Years back do not amount to 4 Packs. From our Tariff being so exorbitant—they resort to Thompsons River where they purchase Goods at moderate Prices.

Judging from the Population being exclusively clad with Beaver, we presume the Country is rich in that valuable Animal, authentic information is deficient, to state their real Hunting Grounds.
