Dear Dr. Duff,

Thank you for your letter of February 23rd which has just arrived. I am very flattered by your kind remarks about my account of the set of Haida Gambling **sticks**. It is particularly gratifying to have you confirm my identifications. By all means copy my illustrations, but note that there is a **bat** on Figure 1, 5 which shouldn't be there. The blocks have been reduced to $\frac{1}{4}$ linear from the original drawings, and have lost a little clarity in the process. Perhaps you would care to borrow the original drawings which are with Mr. W. B. Fagg, the Honorary Editor of Man. I presume that you will make acknowledgement to the Manchester Museum and to Man.

I have no separate but enclose a copy of the whole issue including my article.

Yours truly,

Frank Willett

Archaeologist.
