Tu 28 May

Sat July 20

Sat June 1

May-Sep 74

Aug 14¹³ Tu

Aug 17 Sat

Mon Aug 4-5

Sun July 27-28

Two kinds of symbols:

- a) What relationships exist (frog)
- b) "you do about it" (Laven soving)

- a) situation
- b) scenario, response

The myths contain the verb (scenario) symbols
 "art shows - noun (set of relationships)"

Frog says: "Paradox exists" now lets get on from there

Frog is a 'key symbol'

maybe he is the Haida (equal-sign) "is"

everything else is meaning, frog is existence

W.D. P. 4.
 (1974)

I know of
In, Marcus's

Cannibalism = infertility

equation

Frog would be ultimate infertility

The end of the line in RWC. art.

The controlling "scenario-symbol" is "self" / "to self" / "to one's-self"

eat self
fuck self
kill-life self

see self

-(recognize)

self destruct → death
generate → creation

and ultimate communication
is "to myself"

The controlling verb is "is"

Just a literal verb for which there is no figurative form? live? see?

The most conclusive noun is "frog" (everything else)

profound problem is to have frog see himself
or any face see itself: ambalast, masks, 4 face bowl.

CE's other solution: the self eating eye

Even in the myth was self-creator, by performing an act that was ultimate paradox: simultaneous mutual bite/spit death-life end-beginning. But that meant that he could not see himself doing it. Frog is that act shown in art, as a fait accompli.

And then it played with metaphors of self-recognition

- masks Zaton

- 4 face mortar

- ambalast

Sunday 26 May '74

Maybe the final solution of CE to the
problem of self-recognition was the hint.

- a hint of Frog - in Strong Man
- . . . Raven's Father

- a hint of Thinker in Old Man plate?

- Pieta " Raven's Mother?

- Crucifixion " Raven on Chest?

Just enough so that the knowing eye can see it
. I can see it next time around.

Is this a variation on the threshold of 2d design?

: Raven - as brood on AE box side 3?

: Chest - back as "face"?

CE, with his shamans, was secretly saying that he himself was (as) a shaman.

The artist who mediates paradoxes is
ipso facto a shaman too.

Is Frog a shaman?

Is Mosquito a shaman?

Is MM a shaman?

If art heats at the unthinkable, what is CE's 'looked
eye'?

heating at, not just cannibalism, but
eating (own) eye?

seeing self, eating self's own eye.

that is most horrendous processing of what
one would 'see'.

but still, how would you recognize that
it was you?

I can't see my own face

So have to create one that means me

and have it recognize itself. ∴ Frog.

Ch 6 The Shaman as a Sexual Mediator

M.C.

maintaining a sexual balance is essential to the integrity of the entire cognitive system

The shaman seems to have an extraordinary ability to transform untenable positions into situations which may be mediated. Thus, the paradoxes emerging from the --- symbolic systems are resolved by a plastic mediator - the shaman.

Shaman - mediates sexual imbalance

i. must be ♀?

- mediates cannibalism

- " infertibility

in general, mediates paradox.

It all starts with one thing - the negative.

ultimately, the I - not I

and the question becomes how to recognize "I"

What I touch is not I

let
fact
see

I am what I 'see'

I am 'see'

'See' is what I am

"See" = ie

Metaphors of configuration as well as of identity
relationships

Showing for one particular set of relationships
paradigm of structure
an equivalent sign of a more complex kind

that could be used to knit the whole tissue of
sameness - difference

alike - opposite

into one meaningful whole, a single meaningful whole

the figure-8 with the double-twist
the two linked Möbius strips

the sublime locus that mediates all contradictions

Tuesday 28 May

Frog is "that act" of transition which has just happened
(is the shape of the future)

Does AE's box show Raven & Frog turning into each other?
both on the threshold?

Frog's front half is female, rear half male

Key symbols: (of relationships) Symbols as structural paradigms

1) Nose-beak-mouth (working on that)

2) Frog (. . .)

What others are there?

3) the double-sexed person, clasper-clasped. (CE pole)

4) the grinning bear

5) the part that contains its whole

6) All the type paradigms (spoon, house etc) are symbols
in this sense.

7) Copper

8) Soul catcher

9) Complex head mounds (lungom-yoni, grasper-grasped)

10) Circle

11) Formless, split-V, salmon-trout head

12) Ovoid

13) Beaver, Mt Goat, Shark, Eagle, Moon, KWhale, Bear/Whale
as structures rather than metaphors etc

Frog achieves unity by route of ultimate generalization

He/She is an "everything" that can therefore
eat and be eaten everything else

screw . . . screwed " . . . "

Kill . . . killed . . . "

he is
Yakwehbaygoos - Collymore

He/She is everything that eats, kills, screws
(and is eaten, is killed, is screwed)

The problem still remains for him/her to know itself

see?

"see"

If it can

- Watch itself do all those things (CE gravestone)
- Recognize itself in a mirror image (2 whales)
- " . . . " . . . " . . . " . . . heart of frog
- " . . . all about . . . " . . . "me

Frog, conceived as a vessel, contains life
Frog is the vessel containing all life

CE poles

?

the "both" solution

One who is double sexed,
and a clasper-clasper

the "half of one, and ---" solution
(six of one, $\frac{1}{2}$ dozen of the other)

Two that are half
doing one thing together

1 who is 2, doing 2 lateral
claspings

2 who are $\frac{1}{2}$, doing 1 thing -
1 literal } same?
1 figurative }

Wednesday 29th (?) E

Rose
Beak
Mouth

Trinity

} a 3-way paradox like

or

line
form
field

or Father
Son
Holy Spirit

3

2

1

Rose
beak
mouth

bird
man

Raven

Is all the play an attempt to depict the ^{double} real nature of Raven?
_{paradoxical}

Is it a portrait of a paradox?

• all about Raven?

How do you draw one thing that is two at the same time?
a bird, and a man

eater
eaten } eating

clasper
clapped } clasping

seer
seen } seeing

(Homotax)

(CE pole)

(AE box)

Raven } Frog
Man }
(CE compact)

Is Frog the Holy Spirit? Yaxwel haygoo?
• that which is common to both?

one place to Toronto:

1 that is the
end that opposite thing
and
that which is
common to both

how can 1 thing be 2 opposite things?

nose and beak and mouth

- 1) both $\left\{ \begin{array}{l} \text{one that has both} - \text{Wiget (nose beak + mouth)} \\ \text{one that is both} - \text{Merquise} \end{array} \right.$
- 2) $\frac{1}{2} + \frac{1}{2}$
- 3) a third $\left(\begin{array}{l} \text{neither, but common denominator} \\ \text{that is common to both} \end{array} \right)$ FROG
(so the other are taken for granted)
- 4) transition or mutual intertransformation
- 5) anything
one, and its opposite, + a hint of the 3rd
(which is common to both) = hint of frog
- 6) a third, ^{third} monster that is 1, 2, and both. CHOOSER BK
- 7) $\frac{1}{2}$, necessarily employing its other half AE EYE
- 8) Copper - 1 that is all 3

It's all the same thing

- 1) The ^{incomplete} transformation and the eye that completes it
- 2) Give trouble
- a) half beak, half nose = "Hawk"
 - b) half nose-beak, half mouth = T.L. martlet
 - c) half nose-beak becoming toothed mouth = Spoon
= CE Skimem 2d.

it becomes a version of 6) a third (monster) that is half 1, half 2, and both
= Skimem.

CE's comport is a version of 8) heaven carrying Frog

Verbs to link them \rightarrow (itself)

1) to eat, engulf \leftarrow life (itself)

2) to pierce \leftarrow life (itself)

3) to carry, contain \leftarrow life (itself)

4) to see \rightarrow to recognize

Raven " Men
Man " Frog which contains both

Mostly, it is worked out on plan of FACE

- a) nose-beak \leftrightarrow mouth
2 \leftrightarrow 1
- b) then eye watching it happen
 \rightarrow the eye that ^{knowingly} looks itself

Frog is the common denominator of all life forms

The central problem of NWC art is to explore the ways of resolving the logical paradox:

How can one thing be two?

1) The 'both' solution

(a thing that is both) (toothed beak)

2) The half one - half the other solution

(one of one, $\frac{1}{2}$ dozen of the other)

3) The Holy Trinity solution

This and That and "That which is common to both"

Raven

Man

Frog

4) The "one in the state of transition to the other" solution

(on life-death theme) Raven on chest

Then the game would be to pair 2 solutions in a figure 8

a) a "double" + a "half"

b) a "this", a "that", and a "that which is common"

- or otherwise make a figure 8

one that is 2 has to demonstrate the fact by doing a reciprocal verb to itself:

- eating
- creating
- sexing

eater
eaten
↕
eating

Also: The strain to create halves that are paradoxes themselves
two things at once half that is half one thing
half another

1) Formline: half line, half form
 a part half design, half behaviour

2) Ovoid: half circle
 a half half form, half space

3) Salmon Trout head: half face
 a "half" half form, half space

CE's additional scenarios: all boil down to the same paradox: creation or life-death

- 1) Raven, man, frog carrying each other (comfort)
- 2) Raven, Mother, Father (Frog) cocreating each other
- 3) Raven, Man, Cockle, Gonaqadat, ^{creating and} life-deathing each other (itself)
- 4) Raven, Whale, Benjamin-yoring each other
- 5) Raven ^{Benjamin} (asp), Whale ^(life) (yore), death-living each other (itself)
- 6) Bear, Woman (sister), Man (brother), life-deathing each other
- 7) One, double-sexed - clasper clasped
- 8) 2 frog-whales clasped, see each other

Basic
NWC
Question

→ How can one thing be two opposite things at the same time?
When one of them is two, and the other is its ^{their} opposite
and they are all really the same thing.

They can be 3 things (Raven - Frog - Man)
OR 2 ^{opposite} things and a common reciprocal act

How can everything be its opposite at the same time?
Everything and its opposite are all the same thing.
Everything and its opposite are really the same thing
Everything is really its opposite

↓
'is'
both

One's both the same

It's all the same thing

It's six of one and half a dozen of the other

OK, so show me the 'is'.

Well, it is a noun verbing.

a composite noun, reciprocally verbing
^{single-}
(double)
(two half)

it is a one noun, two-verbng or
a two noun, one-verbng

it is two verbng with one

it is One as a noun, Two as a verb

one thing doing two opposite things at once

a wheel, turning both ways at once

a river, flowing " " "

an eye, seeing " " "

a face, moving " " "

it is a dialectic between One and Two

it is kinematics

it is two being one, one being two

it is two things doing the same thing at the same time

it is mutual orgasm

it is two, having mutual orgasm, and

that which is common to both.

My life is orgasm. God (♀) must be enjoying orgasm too.

How can one thing be two opposite things at the same time?

Bear Mother : baby and father
eater - fucker

and that which is common to both
is Bear Mother, and she is
doing a double-opposite thing:

imagery

an ecstasy

How that you know, what are you to do about it?

- be it, in everything you do (conduct)

- show it, in " " . make (art)

- make things to show it (art)

Show that you know it

Do it

Be it

Renew it, it is right

Make it be, it is true

Thursday (Toronto)

and in 2d - how can one thing be two opposite things?

1) 2 profiles = frontal

: face

: entire chest design

2) Salmon trout head - one thing
- a half

half a face (implying other half)

half form, half space

half form, half behavior

Saturday June 1

How can one thing be two opposite things at the same time?

When it is one thing that is half 2 (nose-beak) and half 1 opposite (mouth)
Such as a face. Let me show you:

1. The Both solution

a) One face that has both (Wegot ~~not~~. nosebeak and mouth)

b) One that is both (merger: nosebeak ^{to the} and mouth)

2. The Third that is both solution

a) (Frog:) Third that is neither, but is what is common to both

b) Monster that is half and half ("Hawk")

c) Monster that is both, and is doing both (Crooked Beak)

3. The Two-Halfs solution: half one thing + half opposite thing

a) Half beak, half nose - (hawk) no lower mandible

b) Half nose-beak, half mouth (TL mandible) no upper lip

c) " " becoming " " (Spoon, CE Skimmer)

4. Mutual intertransformation, ^{moment of} transition (death)

a) Nose-beak becoming another mouth (CE Skimmer) Raven's chest

b) Death transformation (rattle)

one reverse: Raven - from transformⁿ on 2 Chalkat masks

5. One Half, necessarily implying its other half

AE box - one eye

Spoon

6. Copper solution: one that is all three

7. Frog solution: the fact accomplish

Saturday June 1. Working on face possibilities

Start with nice safe manifest impossibilities:

- I cannot see into my own mouth
- I cannot bite my nose
(I cannot pierce my mouth with my nose)
- I cannot eat my eyes
- I cannot see my nose
- one eye cannot see other, or itself

And manifest negatives

- my nose is not my mouth
- a nose is not a beak

Other "face" possibilities:

- 1) "nose" (beak) becomes bird head, so rest of face as body
(Eckhard mask)
- 2) "nose" becomes phallus, or lingam-gone, ^{and head at} same time
(Two Guinea sculpture)
- 3) Nose becomes phallus (eyes become balls, mouth cunt)

Beak is neither
both
half one, half the other

Beak is paradox:
one that is two
piercer, biter

OK, so show it pierce-biting itself
show a paradox paradoxing itself
and you will have a single being with all 3

nose
beak
mouth

: Hawk
: Crooked beak

The urge is for one thing that is two opposite things,
doing a thing reciprocally to itself

Doing what?

- creating? Raven and his Mother
- seeing? ...

Sunday

How can one thing be two opposite things at the same time?

When it is both, doing the same act to each other

Solve the noun paradox by bringing to bear
a paradoxical verb (reciprocal)

Fields:

eater - eaten	} turn them into paradox forms:	both doing both
fucker - fucked		
killer - killed		
seer - seen		

It is the seer that is seen, etc

On 'face' model, verb can be:

eat 'eat'

piece 'piece'

see 'see'

death life

complicated by 2 ↔ 1

beak - nose ↔ mouth

giving bird-man combinations (Raven - Man?)

nose ↔ beak ↔ mouth

How can one thing be 3 things at the same time?
When it is one, and its opposite, and that which is common
to both.

- : Copper
- : Cracked Bark
- : Holy Trinity
- : AE's 4:4

Thursday June 6

How can one time be 2 opposite times at once?
When it is both doing the same thing to each other
When it is transformer-time

Raven & Mother creating each other

Raven & Mankind (transforming into) each other
a transformation into two that are really one
two-into-one time

all time

Oword: is a half

that is half (top) a half of one, and
half (bottom) a half of two.

Half of what? (what thing?)

that thing that is itself half of one and half of two.

Little for a half

- ovoid
- Salmon trout head
- AE's 2:4 one eye of 1001
- Frog

" " " " " " , one thing & " " its
opposite

If you could put together $\frac{1}{2}$ of one thing and $\frac{1}{2}$ of its opposite
you would have that thing
of which ovoid is a half.

The thing about a half is that it necessarily implies etc
other half

its other (same but opposite) half

Start with a "given" (let opposites be ^{the same} equal)

End " " necessary implication (the other half is the same)

Friday

Whatever thou doest is done unto thyself

Indivisible is a symbol, positive symbol (Proper name)

is not, it is not but is not analyzed, ^{and is not} analyzed

the analysis is in the ^{and is not} analysis

neither - man - animal
man - both
man - other
both - man - both
man - animal

} neither and both
at the same time

AKT. counter NEITHER - BOTH

half what you are half what you know

half actual - half not actual

half one, half the other, and both at the same time

neither one nor the other, but

half real, half potential, one -

• proper • secret

• lateral • figurative

• horizontal • genuine

July 20 Saturday - at 4606 and back on track.

Life (living) is the dialectic mediation of opposites

Myth is the dialectic in action (and needs a mediator (b))

Art is a frozen dialectic

- paradox

- mediator

- locus of logical oppositions

A 'symbol', in Cassirer's terms, is ^{the same as} a paradox

Unknown is a mediator, paradox, symbol (Person. theme)

in myth - this is clear

in ritual -

in art, she gets lost in her analysis, ^{and vague 'style'} concepts of 'style'

the mediation is in the iconographic meaning:

neither: man - animal

man - bird

man - other

both: man - bird

man - animal

in art: neither and both
at the same time

The ART creates NEITHER-BOTH

half what you see, half what you know

half literal, half metaphorical

half one, half the other, and both at the same time

neither one nor the other, but

half real, half pretend, and

• profane " sacred,

• literal " figurative,

• inscribe " ^{epitaphic} generous,

Mythic thought is an unending concern with paradox
in myth, the resolution of dilemmas
create paradoxes in order to deal with them
in art, incorporation of logical oppositions
mediation by incorporation
a frozen dialectic

(half-this, half-that
both neither neither
on both } this kind of half, this kind of half, & this kind of both
a multiple object } ① ② ③
on seven notes: all ③ at the same time.

Power (line) - half domestic, half external
. innate, . learned
. ♀, . ♂
. outflowing, . outgoing → secular world
→ sacred world

always complementary, in dialectic

Man creates Raven, God, Beowulf. Man creates paradoxes to deal with paradoxes.

The Enkwes Myths.

- 1) Woodman was chief of the animals (Animals have a dance)
"showed his strength as a man [man is like spirit]
(put spirit on as a belt)
- 2) Enkwes' power: could fly, make people lose their strength and go crazy.
- 3) woodman child with a hooked nose, cry like whistle,
- 4) 'He' found many land otters in his traps
" a land otter with 2 heads
" an animal with a human head (which becomes salmon)
" woodman: (b'Ek'ū's) moving, sounded like sparks
- 5) Woodman is: chief, in country of ghosts
cold (dead)
right-appearance (also his house)
his food is rotten wood, which looks like roasted salmon to those whom he tries to make for lunch
- chief of place where drowned people go.

Burkows
Sunday: The duality does show on the masks, but on a more gross iconographic way, they show him

- dead
- human-nonhuman
- bird-ish
- other-ish

To see it, you must see a broader perspective:
- nose beak play all along RWC
- arrival at human end of nosebeak continuum

- 1) there is a degree of arbitrariness in iconography which was then copied
- 2) there are different plays on man-animal, man-bird, ghost, other, eater of man (on the one hand a cockle --- }
man-supernatural (Tamoque mouth sometimes)
- face turns them into mink
- 3) eye ^{invert} reverse black & white pupil arrangement

Who is Burkows?

He is Thingel Kveta Kha other-man
Kada gazixit

he is incorporated into the ritual scene → Klasta
→ Attekim
myth

He is Rootka Pookme?

Art depicts the $F a^{-1}(y)$ of L-S formula, in terms of b
the mediator

$$f x(a) : f y(b) :: f x(b) : f a^{-1}(y) \quad ? \quad ?$$

Art shows b in the state of $f a^{-1}(y)$? ?

but you have to grant me an initial paradox:

let Haven exist

' Butkows "

Logic of NWC art { let the two opposite sides of a bel. symm. design be the same
(let opposites be equal)

Logic of Myth { let myth time be synchronous & diachronic at same time

Logic of Haven Myth { let Haven be as described, even though he is a paradox
defies normal logic.

Man creates the whole thing by saying:

- Let opposites be equal
- Let Burrows exist, and I'll show you its characteristic
- Let me create paradoxes (Grant me these ^{paradoxes} hypotheses -
Let me have it both ways, ---

and I can explain the apparent paradoxes of the world
Grant me --- zero
infinity
an expanding universe
a black hole in space } paradoxes } and then I
can explain ---

Grant me --- Raven
Burrows
Frog

Let --- the question

Let --- in the burden of imagination
Let me have the answer, and I can explain
Grant me Raven, No Impossible things
and I will explain to you many things

Sept 21

Sunday, July 27 - the language of art

- art creates paradoxes in order to deal with paradox

- man creates spirits, so that:
animal : man :: man : spirit

How can an artifact be made a paradox?

1) Punning : one that is 2 at the same time
a duck that is both bird and whale
a human head that is (also) a salmon head

2) Paradox - (one thing that is also its opposite)

In this language is a yoni
this whole is a part

these two equal sides are opposite (love design)

this empty frog dish contains the world (CE comfort)

this grasps is grasped

3) Dialectic
neither half this, neither half that, and both at the same time

4) Paradoxes doing paradoxes

Raven (a paradox) doing a paradoxical thing

With Raven, that which is undeniably bad has good results
to people with people

Monday Aug 4 74

Reading Harda Texts & Myths

Is Raven the very state of paradox: being that which it patently is not?

The "slender, blue" (bird) in Sky's story as "Raven" in CE's a "neither-both" like blue form space?

a half-this, half-two like Bear-Mother's baby-husband
: patently baby, half of known opposite pair
: with 2 right feet, ∴ half of two

In Sky's stories of Raven he does every impossible thing

- makes people out of shit
- eats shit
- makes people out of dirt
- is eaten by a whale, then eats it from both inside and outside
- rolls up Beaver lake and house, all of which are inside Beaver house
- fucks his father, mother, sister
- eats his own son
- eats his own eye (C. Bunn)

With Raven, that which is unthinkably bad has good results
In myths with "people", "bad"

There is only the dialectic

That which is is also its opposite

What we know as right -- is in the agreeing

One eye calls for another (its partner)

One half implies its other

(which is the same and opposite at the same time)

(∴ the whole is 1 and 2 at the same time)

The Whole can be $\frac{1}{2}$, 1, or 2, or 3, 4, 5, 10, or all

Raven myths are funny because they can be The 'both'

Archaic-type myths are not funny

Raven laughs when he eats eyes. It is atrocious humour

- only weeps crocodile tears
- lies, steals, deceives, shits on the floor, eats shit
- does not & cannot die
- steals food, steals sex,
- cheats and bungs at cheating
(you can also laugh at him)
- can do whatever he wishes, with whatever he wants
 - take ^{real} form he wants
- feels no sorrow, remorse

Sept 15: Like Frog, he has
a ridiculous aspect as well
as a sublime one

Anything absolute is absolutely ridiculous
as well as being absolutely sublime.

Aug 14, Tuesday Sarah Smyth's late essay on Hawk
gets me thinking a bit.

The plays with ideas of mortality and immortality.

Birth is the transition from immortality to mortality
by experiencing both we become mortal
• giving • return to the immortal

Man is mortal

Raven is immortal (ity)

"Hawk" is the transition

both
CONTINUITY
HAWK IS REINCARNATION

Reincarnation
(change)
is
Continuity

On Raven Kettle, top and bottom are 50:50

"Top" is fucking - being fucked self

"Bottom" is birthing - death
birthing - killing

So "Hawk" is that kind of thing I have been wrestling with,
one thing and its opposite, and that which (is common to both)
binds them

death and reincarnation
poses the question provides the answer

Hawk is the double single act of mutual intertransformation

Aug 15 '74

A Haida work of art is -

- an artifact

- a crest animal or other depiction

and - a whole or partial locus of logical oppositions
equation

in a
sophisticated
and complex
secret language
of art

statement

experiment

Aug 17 Analyze Haida *sgana* beings and names

Supernatural Being Upon Whom it Thunders, etc

Greatest - Sea - Being, etc

Are they just

very conceivable generalization, personified?

idealization

Greatest Hopper

Master Carpenter

2. Do names use deliberate punning in the same way as art?

as *sqéama* is: kelp

: jointed grass

:[totem pole?]

[shell?]

as *skil kīnans* is Property-Woman Singing

Fairy-Maid

like bride

Property-Making-A-Norse

"Mistress of Copper" - (Boas)

Wealth-woman

'Stactas are hatching salmon eggs and maggots on a carcass

Skidanzou are Skidou's nephews and hatchers of trouble

Skil -

- Property Woman (mistress of copper, fairy maid)

- wealth

- hat, fish

-

Train - The one who ---- one who is ----

Rankalotlas

Kaactants one who is two

One who makes the earth move as he walks

Aug 17 Sat

Who is Nambiletlas?

[I am]

when you come right down to it?

He who creates things by his words --- and in the corner was an old man... i.e. the story teller I, me, the one who tells it

Master-Story-Teller? is he a Haida god? what would his essential attribute be? (as creator)

Imagination

Nambiletlas is imagination.

The story teller and the story are one
there is only the dialectic

How can a new element be slipped in, that is not totemic?

- John Sky's "something slim and blue"

- "something under the sea"

Am I working on the logical foundations of totemic systems, seeking the un-examined basic element?

- You can blithely start with a paradox like Raven, who can manipulate all things by paradox (as a shaman) because he is paradox

ie you can start with 'both'

but that leaves you seeking for a one that is not its opposite
for an irreducible one

a one that is not "of a species"

for the ^{simplest} thing that meets these requirements ---

non-existent } thing --- a one that is ---
created by me }

You cannot work out a problem without clothing it in images.

The images can be abstract ones

1)  - halving
- doubling

2)  - one
- two

3)  - one } = $\frac{1}{2}$
- two }

4)  implicit
wholeness

Sept 15 [5]  what's package of
bilateral asymmetry]

The images can be natural ones

1)  Cockle shell - a 1 that is 2
[an outside that has a ♀ inside] Sept 15

2) face  } an arena on which to work out
paradoxes (a prime one on the NWC)

The images can be situational ones

1) the "grooming" bear (and CE's grooming frog)

2) "tortured witch"

3) self-fucking (raven rattle) - leading to

4) father-son fucking-necking

5) grasper grasped

6) Bear mother scene of CE - (eg. Killing of brother-in-law)

and this leads to the paradoxes of myth

The images can be ^{structured on} relational ones embodied in crests

1) Raven-fen

2) Bald's Mountain goat, AE's frog, etc

Was the Haida mind hooked on paradox? playing with it
in myth, art, names, etc.

but the greatest thinkers trying to think their way out?
by finding either

- 1) the irreducible one - the one that had no opposite? (copper?)
- the ultimate half (the ovoid?)

the ultimate half

or 2) the ultimate paradox - paradox redoubled

- as in the frame of "frog" seeing itself?

havin eating his own eye

the toothed eye that both sees and eats

the one that
circles at out

These are the two logical roads - but neither satisfy, so
put the two together

- AE Fox produces the ultimate half by solving the
ultimate paradox (line-form-field)

CE (on little poles) played with

ultimate halving

ultimate doubling

} and vice versa

Paradigms:

face 1) nose - beak - mouth - penis - cunt - kill - life

circle 2) Perfect circle containing equal halves

3) Grinning bear

4) Perfect half AE

self-seeing-eye?

5) Self-eating-eye CE

What is a secret? (like Shungo) (like Frog)

- is it an affirmation?
- a hold on the truth of things?
- a demonstration of control over relationships?
a mountain goat? a frog? a shungo?
a formal twig?

What is a myth?

- is it the frame for a paradox resolved?

What is art?

- is it a "locus of logical oppositions" in which a paradox is resolved?

in various paradigms:

- the "spoon"

- the house pole

- the soul catcher

- the rattle

redoubled to Raven Rattle

- the staff

What are the fundamental paradoxes?

- living - deathing

- seeing

- being, being seen

- one, being two

- opposites being the same

CE's Museum gravestones use all the following paradigms:

- nose-break (of "hawk", etc)
- profile = $\frac{1}{2}$ (in flat design)
- perfect circle eye
- self-seeing eye (of AE)
- self-eating eye
- whole-part (biter-bit)

and a new twist of her own

What can I say about the area I am working in?

- it involves the inner logic of the systems concerned
- there is an inexorable strain for logic & consistency
- Levi Strauss shows that myth is about paradox. At one level, the basic problem is a logical problem

- Levi Strauss shows the "science of the concrete".

- it gets expressed in paradoxes

at one level it is the ordering of things involving same-different, same-opposite, literal & metaphoric likeness

- it is structural, relational rather than just identificational

- it is implicit, esoteric like "riddle-talk"

shamanism

- in a sense it is a secret language, covert, metaphoric

- at the cutting edge of thinking about it, it is "about itself" (as abstract as AE's box)

it is "thinking about thinking"

"the logic of logic"

the self-observing ego

it is about the limitations of human thought

it is bricolage

it has different levels of meaning at the same time.

it is self-conscious

it is (mostly) self-consistent

Yet tadza-i - a pun

Yet na'o - a paradox (Lava is immortality)

- white bird (of heart) etc)

- purple - 5 (in flat design)

- perfect circle eye

4 (compass) eye

5 (compass) eye

At least only 2 or 3 or 4 or 5 or 6 or 7 or 8 or 9 or 10 or 11 or 12 or 13 or 14 or 15 or 16 or 17 or 18 or 19 or 20 or 21 or 22 or 23 or 24 or 25 or 26 or 27 or 28 or 29 or 30 or 31 or 32 or 33 or 34 or 35 or 36 or 37 or 38 or 39 or 40 or 41 or 42 or 43 or 44 or 45 or 46 or 47 or 48 or 49 or 50 or 51 or 52 or 53 or 54 or 55 or 56 or 57 or 58 or 59 or 60 or 61 or 62 or 63 or 64 or 65 or 66 or 67 or 68 or 69 or 70 or 71 or 72 or 73 or 74 or 75 or 76 or 77 or 78 or 79 or 80 or 81 or 82 or 83 or 84 or 85 or 86 or 87 or 88 or 89 or 90 or 91 or 92 or 93 or 94 or 95 or 96 or 97 or 98 or 99 or 100

If a single, prototypic, fundamental paradox is needed,
the self-observing ego serves par excellence.

Wedded to the concept of reincarnation, it gives another
basic problem in logic (Collyer's problem)

Sunday Reading Susan Kerr's essay on "Crow"

Hawk is incest?

Hawk is reincarnation?

Reincarnation is incest?

Sequence:

- 1) Creation
- 2) Incest
- 3) Deluge

In Haida myth, "Raven" is sometimes called Yet (Thought),
sometimes Wiget (Tremulous), but never Koya. He is
non-killed, a "principle" or "premise" rather than a bird-mouth.
The other gods are also principles: "Greatest Fool", "Master
Carpenter", etc.

Is Raven foreign to an intellectualized Haida mythology?

Monday: In Haida, Raven is sometimes called Wiget & Yet, but
what about the Nas form Txemsem? Sure, then he is
as Skemsem. "Hawk" (Skemsem) in Haida art is Raven.
Shown as Nonkilled, or paradox, as
beak-mouth

As Wiget, he has a non-beak, both beak and mouth
but also both 'beak' and 'mouth'

he fucks his mouth with his nose

In art, a raven figure is 'Raven' by metaphor
, a 'hawk' " " " " analogy of structure

the first merely identifies him
the second shows what he is like as well

Nenkhetlas - beige is the infant of Becker's book

- who is all powerful
- who is his own father
- has sexual access to his mother
- whose entire world is his own body
- who ^{ate, is an animal} shits, eats shit.

'Hawk' is the half-animal
'Hawk' is the half-animal

is insatiable, immortal, unexpressed
both total animal and totally symbolic
(hawk is the half one, half the other)

Is Nenkhetlas also the model of reincarnation for the Hordes

- he is his grandfather
- father (the father's himself)

Technique of immortality used by Indians ^{NWC}:

- 1) Reincarnation
- 2) part of 'that which is living' - identity
- 3) Name which is hereditary (yupa to yoon)
| two ideas mix here: perpetuation of house
: reincarnation of soul
- 4) Ideas are immortal (CE to WD)

If there has to be a transition, let it not be life to death,
but life-to-life. The life of reincarnation, of the species,
of frog. Bear dies, frog lives.

Frog is "that which is common to both" (man & heaven)

Tuesday: Is art and myth a response, a reply, a rejoinder, an answer to the human dilemma?

- an attempt to construct an answer?

- a doubling of the half-ness?

- a paradox that points the way out of the paradox?

let 2=1 (and I can live again)

let part be > whole (" " " ")

[let life be everlasting]

[For the Gift of God we Eternal Life ----]

[...and ye shall be born again]

ART { -let me show you a thing I have created that has the necessary set of conditions ---

= a halfer halfer paired with a doubler doubled
(a double-linked mobius strip)

a locus of logical oppositions

a double, ^{linked,} balanced locus of logical opposites

(idea and thing)
(at the same time)

a "thing"-created by man!

- having qualities not found in natural things

- embodying principles

canceling out the natural laws

being and not being at the same time

just grant me - paradox, and I can build sanity-keepers

let me be both animal and god

grant me the lie, if I give you its recipe

I will build the defenses: the myths

the art

the societies, cultured

The best form of denial of death is the
celebration of life

True self-consciousness is seeing equal halves
of each: the celebration of life
; the dread of death

True self-consciousness is the acceptance of death?
as CE does it on Raven top of chest

What "kind of thing" is a work of art?

- a message and its code at the same time
- a ^{seemingly} message, a code, and the implied ^{real} second message

ostensible message }
code }
implication }
1) an ^{ostensible} message }
2) a code - } the code of paradox } There is a constant
3) the implication, in the present instance } message too, a constant
} reminder of the way things
} are.

eg CE's Raven-Fin gravestone

1) He is a Raven-Fin (who is here dead)

2) but a Raven-Fin is a paradox, and let me
make that doubly-clear

so, therefore

3) dead? no

eg "The World is as Sharp as a Knife"

Harda, in effect, say:

I see the problem. Grant me that that's half the answer, and I can take it from there. If I can set out the problem, I have half of the answer. ^{Then} If I can set out the conformation of the answer and say "the answer is isomorphic with that".

Grant me 2 things: ("it is as if...")

1) paradox

2) isomorphism (analogy of structure)

} are opposites and the same

and I can get close enough to the answer.

Grant me paradox, and grant me - primary process?

- that meaning is in structure

and I will show you "the way things are for man"

Art and myth are culturally matured answers, the answers of the leaders and the thinkers. Edenshaw was not just finding a device to delude himself with, he was fashioning an answer for all his peers. Therefore we can be sure that they deal with fundamental and generic things, not idiosyncratic things. He is in dialogue with all the thinkers in his tradition. In showing them the "Edenshaw solution", he is not hiding behind his own secretly contorted mask, but offering a solution to all. (unless he is offering only a secret message to his to-be-reincarnated self).

In a system of thought

There must be a relation between the most basic logical problem and the most basic logical premise. They must complement each other: be isomorphic like Yin & Yang.

Is it that they are the same?

the one, phrased as question

the other, as "premise" (conditional answer)?

And with the Haida, it gets stated as above:

let there be paradox
let there be isomorphism }

Wednesday: So the whole system is a vital lie?

- the safe thing it concentrates on questioning is the basic premise on which it starts?
- the basic premise is the basic question?
- seeking the basic premise?
- an elaborately constructed plot to explain the way things are?
- an ACT OF KNOWING
- a proverb
- a doing of a thing in a way that shows understanding of the way things are and it should be done
- a seeking for that way to do it

The Horda did not have a Supreme Being exempt from the paradoxes of this world (?)

Even Sens was born in paradox

• Rankiloblas • " • " •

They were not above the law of paradox
Like us, they embodied paradox

Sept 15. So there was no Coalition,
only Transformation
all absolutes are absolutely absurd as
well as absolutely sublime
They are only absolute paradoxes
(You can't escape paradox by that route)

As Edvard Munch's works of art are statements of the conditions of the human universe in the form of

- 1) - ostensible message
- 2) - code (paradox)
- 3) - i.e. implied meaning in the present instance
- 4) - i.e. reminder of 2) the way things are.

What are stone works of art?

a) Eternal medium: ∴ denial of death, but not in form of memorials to the dead (gravestones), but in 2 forms:

1) celebration of wellsprings of life

- phallos, sex union

- puberty, woman

2) statements of eternal principles, lasting truths

1) is related to the attainment of immortality by means of procreation, to the living on in one's descendants which is important to us, and is sometimes phrased in terms of continuance of the name or lineage.

[There is a problem here for matrilineal societies, where one's own offspring are not one's successors or continuers, as they have a different identity.

This may help explain the idea of reincarnation from grand father to grand son (or at any rate ^{someone} within the same lineage).

Also, does it raise the question of how else to achieve immortality? E.g. through art, or ^{progeny} teachings (uncle to nephew) or ^{symbols} rituals, etc - other symbols of identity and continuity. Symbols of continuity to which indiv. souls can attach themselves.

New Ethnographic Outline

- 1) Creature comforts : food (shelter, clothing) :
: sex
: affiliation

2) Soul-comforts

a) Dealing with Death

ai) Dealing with Time

b) Celebration of Life

i) How the World Is

Cosmology

Mythology

Metaphysical premises

2) Creation of Symbols

i) Art, Architecture

ii) Myth

iii) Social Forms - putting things in order

3) Self-realization (the "life-cycle")

i) Birth & Socialization of child

ii) Remaking the infant's image ("being reborn",
'growing up', 'rites of passage', etc)

iii) Shamanism: Coping with all this

iv) Dying

A) Products (by-products) Contribution to Man's Existence

[As i. matrilineal people were prone to turn to other vehicles of immortality, eg. the expression of eternal principles (9)]

[My unique expression of the eternal gives me immortality.]

such as Yin-yang - union of the sexes

- union of opposites into the one

THE ONE is THE ETERNAL

Truth . . . lastingness

Doan's society is a total mystery system. The entire culture is a Yin-Yang dialectic. Its perfect symbol would be the 2 linked Möbius strips, but they had to find a totemic and brocolage-like form of symbol to say it.

What they had to say was that

the eternal interaction of opposites is the One

They sought out opposites:

♂ - ♀

inside - outside

one end - other end

1 - 2

and grafted the message onto boxes, spoons

" created paradoxes: Lavin, seal catcher

" gave ♂ things a ♀ half (bird man)

Art puts metaphor together with analogy: a Baxbak mask is a metaphor for ("represents") Baxbak; but it also is a demonstration of what he is like, his structural characteristics.

The unit of time is the act, the deed, the event
 it is an affirmation and a transition at the same time
 continuity change
 it is the meeting point of the 2 nature strips
 in the diachronic realm

Deeds are more or less structured, from a nod of the head
 to an entire initiation rite or housebuilding potlatch.
 Indeed to a lifetime, and to manners of death.

Denial of Death? = Denial of Time?

One form of control of death would be control of time
prevention of aging (of growth, of evolution, of change)

Change is death (stability is time is life)

Summer is life. So is daytime, light

LIGHT IS LIFE

So is consciousness (as opposed to death, unconsciousness,
and sleep)

So is the seeing eye (what more ubiquitous image is
there in the art? What more compelling image than
eating eyes? eating your own eye (as Kawabata does),
the self-eating eye?

How to deal with time?

- 1) Stop it, arrest it (eternal moment of youth) in Art.
- 2) Reverse it? ludicrous. not done. The cure is as bad as the disease
- 3) Ignore it? have myth time and narrative time at the same
time as in myths. narrative time takes up no
real time
- 4) Recycle it? (as day and night, as summer and
winter, as seasons, as renewal of species)

This seems to be the main answer: Time is cyclic.

So fit man into this, and make him cyclic too,

through "reincarnation" of souls and
permanence of symbols of identity (names,
crests,
houses, etc.)

Man is half-cyclic
half-eternal

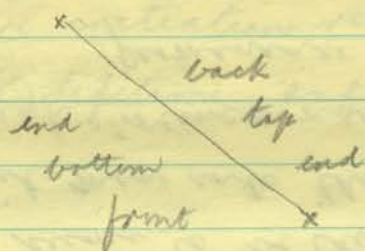

- 5) Meet the moment with response based on
eternal truth. ACT RIGHT.

The problem of time is solved in knowing how
to act right.

half
animal, roller
man (symbol) horse
a) recycled
b) contained
c) knowing at to be true

Is Raven Raven on "on the outside" Raven
& "Hawk" "on the inside" " ?

the one a "male" (outside) how it appears
the other a "female" (inside) ? how it is ?

On Tongans mant, the 45° angle
mediates

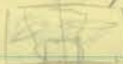

2 opposite ends,
which become
top & bottom (♂ and ♀)
front & back

end - end } all become the same thing
top - bottom }
front - back }

∴ also with inseparable opposites ♂ & ♀

Thursday

the meaning of the — and | of the T
is perhaps, like the copper itself, lifted from
the chest design 

the vertical axis | refers to the meaning of bilateral symmetry:
"these are opposites that look the same"

the horizontal axis — refers to head-body alter-ego:
"these are equivalents that look ^{like opposites} opposite"

— opposites that look like same

| same " " " " opposites

meaning
what it means

appearance
how it looks

a state where the
2 ends also
become top and
bottom. On
Tongues one, 2nd of

the 45° angle of the northern handmaul
is a brilliant mediation of the two
using "the shape of the problem"
and applying the "half of the one, half of the other" solution
to make a synthetic "both",
a "from-the-inside" both?

Was the T transferred from Copper to  metal?
(which would make all T mauls post-contact?)

Memorial & mortuary poles are not monuments to one man

a statement of continuity of lineage in the guise of a memorial to one man

(don't show his specific exploits, or things distinctive of him alone)

- they are monuments to the continuity of his lineage
- " " " his symbolic immortality
- " " " change, transition, recycling

The Haida do not remember specific men as heroes. No Charlemagnes, no George Washingtons.

they transfer to the symbols - the clan hat

- the crest - the name

CRESTS ARE SYMBOLS OF TRANSFERENCE, permanent
Men are ephemeral

xat - "father" - "outer shell" = metaphoric identity?

a statement of mediation of 2 categories

Housepole is a monument to mediation of opposites worked out in the confining language of crests

Sporn is the housepole paradigm freed of the constraints of crests (though still striving to use them on occasion) and mediating paradoxical opposites:

bear - raven
♀ - ♂

a complex equation of mediation

The dance of the opposites. Define same as opposites,
 opposites as same, and have them dance together
 Bring opposite and same together, make them part of one
 dance

[model; the family: Uncle } Father
 Mother } Aunt
 Son } Wife
 Nephew } child

intimates split into
opposites

this is the meeting of the 2 mobius strips
 this is the place of dialectic
 of mediation

this is where the knot must be tied

by art (on the housepole - house complex)
 by ritual (in the give & take of social life)

bring opposites close, and mediate them

structure them

challenge them

TAME them

Make them "as one"

i.e. both (in a sense, 2)

as half-one, half the other (in a sense, 1)

Synchronic balance

+

Diachronic alternation

=

the way things are

[Faint background text, possibly bleed-through from the reverse side of the page]

[Faint background text]

[Faint background text]

[Faint background text]

[Faint background text]

[Faint background text]

[Faint background text]

[Faint background text]

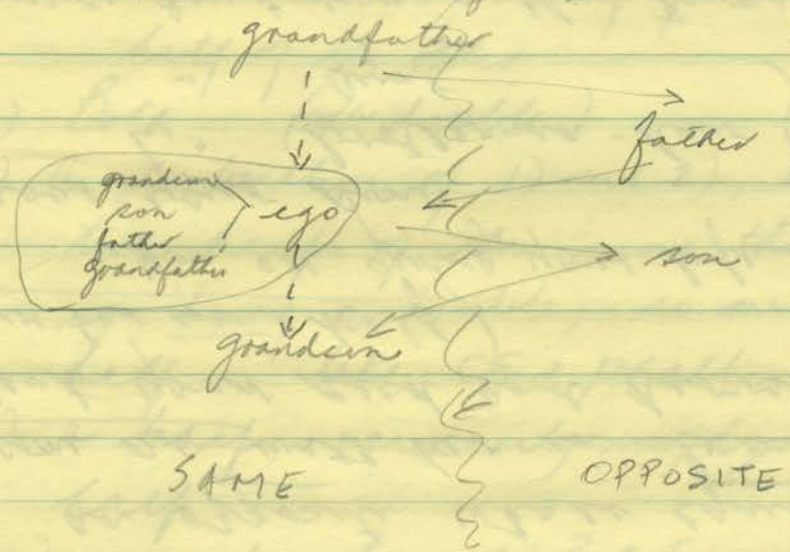

[Faint background text]

Accept the impossibilities of the human condition, but tame them

- : marry an opposite and mediate the consequences
- : accept alternation of life - death

arrange synchronic bilateral balance

all in one
accept dichotomous alternation (death-rebirth)

for "the world is as sharp as a knife" in life-death cycle and accept death as gracefully as you can: because

- it alternates. You are recycled
- this is not the only world here, and man is not the only form in which you can be alive here

this is the situation:
- you will be back
- you will not really go

: show how, by art and myth, paradoxes can be mediated
opposites can be as one

That - which - is - common - to - both ^{an} ^{thing} is ^{exclusive}.
The much we can say:
It is the same as

That - which - is - common - to - everything, and
∴ that - which - is - eternal
it is
that - which - is - everything - everywhere - always
(the ground of being)

all we can do is
- bring into balance ^{parts} halves of it, halves of it
Make balanced things
Do balanced deeds
Make balance have balanced lives
Mediate Dance the dance of opposites

Marry an opposite who is equal
become one with her in sexual union.
plant your seed and harvest opposites
(give her your half)
you are giving your life

Honour your son
" " brother-in-law } knows your
" " aunt } "outer shell"

do what you can about your descendants {
Get your daughter & your nephew to marry, so their son will be you
Get your son and your brother's daughter to marry so their son(?) will also be a closet grandson

Make the best of the way things are.

It is as if they say:

I can set out the ^{logical} shape of the problem. It is
let opposites be the same. Now how can
I make opposites the same?

1) $\frac{1}{2}$ and other $\frac{1}{2}$ Half of one and the other
half of the other

2) Both - (a double)

3) A combination of 1) and 2), interlinked, as
two halves of the same thing (which ends
up being a double, so must mean a
half, like CE's phallic state poles)

4) a half, necessarily implying the other
half

4a) a combination of 3 & 4.

and 5) a search for "that which is common to
both".

6) all 3: AE accomplishes this, by pairing it
with 4).

half line }
half field } + half image
half form }

as $\frac{1}{2}$ (with Laven Screen)

as $\frac{1}{8}$ one of 8

1) $\frac{1}{2} + \frac{1}{2}$ as a ①

2) $1 + 1$ as a ②

3) $2 + 1 +$ common⁽³⁾

4) a balanced combination of ① and ② as a ③

5) $\frac{1}{2}$ (the other necessarily implied)

5a) a $\frac{1}{2}$ that is constructed of half-2 and half-one {dvoid
STH.
(the true circle is the implied whole)

What is art about?

- play with form and image
- life, sex, fertility } images of life-death
- death,

- the shape of the way things are.

 : in structural images (copper)

images of identity (copper) in conceptual " (Gonagadet)

 : in mythic " (Snake - vagina)

 : in ^{highly} condensed symbols (frog)

- the balancing of opposites

the shape of the way things are.

It shows a human and

Desperate logical search for certainties in an ocean of chaos, differences, incomprehensibility. The search is for the shape of certainty, which is, the balance of opposites (or at least we re-define it as that).

Having so defined it, having stated the premise we can act as though it were true (and \therefore make it true). We can bring certainty and balance into a world of chance. we can find the balance in the world, and we can balance the world for our purposes as well as possible under the circumstances of time and death and chance.

Are there "laws" of nature? which we can trust to work? No, just a tentative hypothesis which we must always make work. Trust? no, doubt.

What is it about
Raven's cunt hunt = form and castration?

These things on the reef ate their way into place
(hence castrated men)
and became the thing that castrated
∴ cunt is castrator

Individuation in a tribal society?

Witness Cuaneah, Cowe, Albatree

(but Cuaneah was not revised by later generations)

Sublime

the eye that
can see
the copper

Friday Perhaps the most powerful determinant in culture is logic. Why cross-cousin marriage? It is logical.

At any rate, the underlying structure rests on logic, and must be congruent, and her unspoken logical premises. If we concentrate on that level we can find the logic. 'That level' is ^{explicit} shown in art, implicit in myth & ritual (and all expressive aspects of culture, with which the people ^{celebrate} teach themselves who they are and what to think).

Saturday. Raven is unrepentant. He is exempt from death. He is bodily hunger and sex incarnate and unbridled. He can fuck his mother, eat her eye.

He is both man and god - the advantages of both. He is 2 in 1, a paradox.

Rosman & Lubel (and Swanton, Murdock, etc) talk about the house-building potlatch but leave out the iconography of the housepole, which should express in the clearest ^{structural} possible terms "what is going on". It is a melding of opposites.

Is the art trying to work out the logical problems
involved in this society?

Why can't I marry my sister? =
What if I married my sister.

Why can't I be my own father? =
What if I were my own father.

Why can't one be two? =
What if one were two.

The burden of the imagination
is that it lets you off the hook for a while
You can't try the opposite on for size.

How can I marry my sister ?

• • • make father and uncle the same ? } then I would be my own father.

father - wife - children all the same lineage ?

OK for Henry Ellenshaw, they were all Statas

but not for AE ? wife R19, father ? R13 ?

not for CE wife R19 fa R13

fa - mo - dan produces the HE form

mo - bro - dan ? • CE " ?

I cannot marry my mother (and be my own father)

" " " sister (my mo dan or my fa dan)

I can marry my closest opposite: mo bro dan or fa sis dan
the closest thing to my sister on the opposite side.

51 Dear Mother is a father in the shape of a baby
is he or haven't?

Here I am and there I am
and both are me!

lechery - gluttony } what man has to do is
itchery - scratchery } control the urge

lechery → ^{remains} coat
gluttony → shit
scratchery → ^(blood) scab

Answer: why the absence of semen in myth?
except for the flood

Maybe the main man spring is not the denial of death (that is just
a by-product of self-consciousness)

maybe it is self-consciousness itself
asking why? how? (curiosity)

What is self-consciousness?

it is being 2 things at once: observer & observed
the self-observing eye

but how can one thing be two reciprocal opposites

there is the form
the basic question
take an art.

Answer:
When it is one thing, its opposite,
and that which is common
to both.
like Dear Mother

September 2.

What is a work of art? Not a nice depiction of a thing or being. A locus of logical oppositions. A "what if...". A little nightmare

The things depicted are not things, but anti-things, things that are half this, half that
half this way, half that way
a bird with ears

a self portrait

a portrait of man

the way things really are

half animal - half god

both

the human condition

paradox

dilemma

a double being condemned to the life of a half

a self-conscious god " " " " " an animal

Linked pairs of reciprocal opposites
each of which is one that is two (to the opposite two)
one and two at the same time.

I glimpse a perfect logic, a structure, a balance.

In the perfect circle, it is all there, but all latent

The logical mind of the NWC was on a terrific adventure:
The imposition of balance on the ^{paradox} chaos of the world
It solved it - in the copper

then the game became variations on the theme,
retatements

as one

as a one that is 3

as two

as four (AE)

The basic cognitive paradox is the half-double paradox
Helping re Doubling. Also, everything has 2 opposites

I cannot be a one that is $\frac{1}{2}$ three, $\frac{1}{2}$ that
without being both
is " " " two

I cannot be a one without being two
" " " " neither " " both

One thing, its opposite, and that which is common to both

- as Bear Mother

1+	Man	1-	Woman
	fa		wife
	son		mo
	2+		2-

two, four, linked in one act, which is perfectly reciprocal

- as Copper

- as 2 marks

idealized generalized portrait of mankind
it is interrogative - leaving to the reader
that (both neither) ^{one} which is common to both.

- as back of Haven Kettle

as lingam-yoni

- as Yea Yang

Zero has 2 opposites: something - everything and Infinity

Contrast pure-image : artifact-image
 Sublet Image SHF Bowl

Superimposing an image on an artifact gives a ready-made: one that is 2 that is one.

: patent one that has 2 identical ^{hammer} head that can be made Conceptually one
 ↑
 as what one means

an artifact has a conceptual identity: "spoon"
 (with spoon-ness)

it also has a patent structure: 2 opposite ends.

applied images have to do with spoon-ness (mouths)
 but also with structural oppositions. (raven-bear)

Note that Stone-Mask is only a conceptual mask
 • • Tongans Maul • • • • • maul

an image of a mask } Concepts to be
 an image of a maul } kept in the back
 of the mind
 an image of image (stone mirror?)

Image is one species of symbol
 of one that is two

the general problem is one involving 'symbol'

a search for the "that which is common to both"
 (singularity)

The arena of the logic was art
The logical arena was art. The art of one-things
Borrow the ^{patent} quality of ^{explicit} one-ness from an artifact
(spoon, hammer)

Make it the unity of the "equals sign" $E = mc^2$

Make it an equal-sign made of reflecting glass so that
it incorporates within itself the ^{means} ^{unity} composite image of
those things it is equating.

Make it also an image

The image (is and) is not the hammer

it is the hammer's alter ego

counterpart

reciprocal opposite

That is why art is the arena for the search for
the singularity. It already possesses that which it
is searching for, patent explicit one-ness. The one
thing that goes without saying is that it is one.

OK, now make it a one-that-is-two. The best
way to do this is to put the image on an artifact
Then you have a 1 that is 2 (hammer, head) as one

one-that-is-two-that-is-one
patently one, conceptually two

The trouble with "is" is that it has 2 meanings

A copper is not an image of anything else
it is an image of reciprocal relationships
(is that what a whatist is?)

inserting first labret is a symbolic defloration
labret is a symbol of sexual capacity (ie fertility, ^{woman's} power)

The really-root question is
"What does 'is' mean for man?" (consciousness)

If I knew, then I would know

what does 'one' mean? } what is (singularity)
" " two " } the difference? (")
" " 'me' " ? (self-consciousness)

The verb is is the one in terms of which we explain all other verbs
" relation one " . . . " . . . " . . . " . . . " . . . " . . . " relation

so how is it to be explained?

You can do it with art, by selecting something that
begins with the 2 potent qualities:

- existence
- one-ness

The trouble with "one" is that it has 2 meanings.

We begin that question with our \equiv equal. sign

In $e = mc^2$ we carefully define all of the terms except the one in the middle

= lies there unquestioned, non-specific ^{the half-hidden universal} point of logic

The HWC equivalent is the superimposition of an image on an object
_{patent unity} _{concept} _{thing}

then they are patently one and the same

but the question remains, what does that mean?

and the greatest art tries to answer that

with a neither, both: "that which is common to both"

So the very presence of an image
raises the most basic of questions:
"what does is mean?"

it flaunts the question

announces its preoccupation with the very question
(because it has to be the image of some chosen thing)

(" no image is non-committal, meaningless)

(meaningless is the very thing an image cannot be)

(it is always an image of is)

(" " " " " a one) (n a g.)

one who...

He who...

that which...

images - give existence to ... (bring into existence)

- make a unity of ... (unify)

how did it begin? (Creation)

what is it? (Transformation)

What does the stone mark see?
What do you see in the mark? Geneva markend
That's what it sees too.

Frog is that which is common to
Haven
Man

The image on a stone hammer
either means "stone"
or "hammer" } or that which is common to both

The image on a stone bowl
either means "stone" (that which is like stone)
or "bowl" (that which is like a bowl)

The Mike-Kew-Response what is it?

What Nah! you see on the ground? You've mistaken
The Couldn't be - answer

It violates the difference between one and two

• " ordinary logic

• " Occam's principle

• " the ordinary way of looking at things (as "The World as ..."
violates the ordinary way
of thinking about things)

It's just a frog

It's just a mother and child (Erdem)

Maybe Art has to jolt people out of the ordinary way of looking at things

(as riddles tease people about the ordinary meanings of things)

(• myths play with the ordinary conduct of things)

We only experience what it is by experiencing what it is not.

That's art's bag - this is the modus operandi

and the trump card it holds is the patent one-ness and
is-ness

of a chunk of rock

Sept 11.

mc^2

- the question begging equal-sign
- " " " " " " " " " " " " " "
- sets the cat out of the bag
a Euclidean slip

forgetting for the moment that the two ^{sides} ends of an equation
have to be opposite as well as the same (but the two ends of
frog are ---)

CE's is a redoubling?

But dammit, if you violate Occam's law, and have
1 that is 2, where is it all to end? Then you have
1 " " 3 (this, and that - making a generalization - and ^{that which is} common to
_{both}

1 " " 4 □

1 " " 5

1 " " all? □

and also "abstract relationships"

a) a thing that is half 1 and half 2

b) half this - half that

- end - end canoe, bowl
- inside - outside bowl paradigm
- ends - middle soul catches
- hand - hand (5=5) - eye - eye (1=1)

All these use "patent one-ness" to "make the equation"

c) 4 outside = (outside) $\frac{1}{2}$ \rightarrow [then 2=1]
[let 4 = $\frac{1}{2}$]

but the 4 have to be identical

A face bowl

d) [let] half be 'double', half be 'half' [Then the 2=1]

e) inside - outside
part - whole

"Let" (if) as shown on the artifact
the statement

"Then" (the intended implication)
the meaning

Sept 12

Relations between 2 and 1

1) - Put them into an active relation (Let them have a relationship, a loose relationship)

two "making one"

2 screwing 1 : Bear Mother $[\frac{1}{2} \text{ screwing } \frac{1}{2} = 1 \text{ known Rattle}]$
in(=) 1 : Secret Image
: Leach Minister

"eating you up"

using the patent unity of a piece of stone to "make the equation"

2 eating 1 ? : Tugot Bear ?

self-recognition

2 seeing 1 : Twin Marks man "seeing" frog (=harvest)
: CE's Frog/Whales

a non mathematical relation (non-abstract (not "equals"))

2) One equation says  $a = b$ 2 things mediated by "equal" sign which begs question

These equations: re one

with 2 things superposed
juxtaposed
opposed

it is a better one - new than the = sign

Simplest form is the knotted word: man head is head

but when you put 2 parts or 2 things on the (one) and put them into an active relationship with each other, you can explore what "equals" means

a) head = "head" literal = metaphoric
2-things that share the same metaphor (head)

let one thing eat itself
 see itself
 know itself
 "be" both (be two)

then "all things are possible"
 all opposites are mediated
 (on a gravestone
 but not on a mortuary pole)

Saturday

Balance scale symbols of balance were so engrained on the NYC (whatits, labrets, coppers, boxes) that they were ready to go on and play with the next concept: THE IMPLIED OTHER HALF

Take the bilateral balance for granted (as "given", as "going without saying", as a "necessary implication") then fill in the two blanks in a different way.

One different way is to "leave the other half to the imagination" (☺), to equate what is shown and what is implied, the statement with its meaning.

A whatits or copper (etc) make the implications the explicit part. It turns reality around, shows the hidden premises rather than the things they apply to. It is "the way things are" in general, in the abstract. It is the logical end point. Since it isn't about any thing in particular it is about everything in general. It is not about things, but about relationships. It is reduced to the essentials.

Species 3: Symbols of BALANCED OPPOSITES

Opposites in Balance

dagger 

spoon 

house 

2 in 1: 

 (head-
head)

Species 4: Symbols of FOUR-SQUARED-NESS

dish 

canoe 

box (front-back that
covers the side-sides
to the imagination)

now make all four the same

 4 face

Rawm-Screen

AE box

but only if they add up to half

Appendix 1

No. 1. Apperit - what's it

- non-vascular

they are essential halves

system latent article
over
non-vascular-heat
one horn
one eye
on half of a balance design

even great extent that m
of these to other to over
found in to this game

The trouble with an equation is that it is a statement
that hides its premise
if I could know its other half...

The trouble with art is that it deals with terribly
disconcerting problems

The glory of art is that it is a coming to terms with
terribly disconcerting problems

The trouble with One God in general is that he is not the god of
anything in particular

Species 8 : The Matched Pair paradigm

2 stone marks

Two front corner posts

Raven Screens -

a pair of benches

TP's matched slate poles

"Twin" paradigm?

2 that are 1?

The Top figure on a pole: is it being skewered?
(Big TP pole in museum with Raven-Frog-Bird on top)

Species 5: Outside - Inside paradigm

Bowl paradigm }
Dish } Containers & what-it-contains
Canoe } (Yoni - lingam)
house } Just - whole
box, chest } "outer-shell" & what's inside
Compart }
Circle }
make the equation with Social Structure
a cockle is an outer-shell
that contains both father & mother
♂ + ♀
so its outside also contains both

Species 6: The Gunning Paradigm Pool Paradigm
It is Really its Opposite

Gunning Bear }
AE's Mighty Mouse } it doesn't know that it is really
CE's Frog } its opposite
Weak's Gunning Bear too }

Species 7: The Double - End Paradigm

Toothed Watch }
Skewered Wolf (Bear, Raven) } either way, it dies
it has had it

That salmon becomes man (in the eating)

" " has "man" inside him

That Bear thinks he's eating salmon, but is really eating himself

That Raven thinks he's creating Man, but is really creating himself.

One way to TRANSFORM

① is "from the feet up"

- Raven enters baby's foot
- CE Joseph has Ravens? feet

foot - foot to head
head to foot

② another is to go onto a headress

- CE's Man-Raven

Runs through a hat

↑
the reverse of a whirlpool
TORNADO Hat
twister

③ Inside to outside - CE's Raven

④ "Conceiving himself to be born"

⑤ Creating - birthing (CE's Raven sister)

There is no Harda SUN crest

" " a " " TABOO - no mention
no word
no crest

The most obvious thing in the world must never be explicitly mentioned. It is always implied. It is an eye, ubiquitous, "goes without saying",

There is also a circle O taboo

Species 9: The one that is All Three Paradox

Copper
Bear Mother
Eschelt Image
Raven Kettle
(Haven Man-Frog)
↓
CE Compost
(Raven Man-Frog)
CE Angel & Man

That, & That, & That Which is Common to Both
Holy Trinity (or logical counterpart of)

Species 10: The endow it with gravity and make it
a symbol of - paradox

Frog (antithesis)
MM (both & all four)
Raven (paradox)
Skiamson (transformation) also Moon
Shark (bisexuality)

simplified symbol of a complex concept

Species 11: The "endow it with supernatural life,
name it, and make it a "spirit"
(and you are into the bag of religion)

Thought yekp
"guardian spirits"
s'x'lid
Harde taxet, Kag,
Creek-women
Tia Skil "Jarry"
Zins synagwan
Yaxowcheygo (TL)
Yatawa-ht-tlan

"the spirit of ---"
"the very soul of --- (recon)" when a man
soul
masks
"the god of ---"

to the logical conclusion of light = see = eye
all seeing eye = SUN

Bear Mother of All of life

Review, Mr Paradox, is of limited utility as a
Creator. He can only transform, he cannot create.
Paradox is of limited utility in explaining the Universe
(but is paradox the most powerful tool in man's kit?)
There is no creation, there is only transformation
There is no nothing, there is only opposite somethings
(and the trick joke? is to make them part of one
like heaven-ten

inside - outside

point - curve of belly

part - whole

top - bottom

"and that (curve) which is common to both"
(by means of that)

by virtue of --

Paradox is the child of transformation

when one is the conclusion, the other is the premise

Existence is the child of "Creation" ("Origin")

• "invertable", "virtual", "very", "potential",
"actual", "ver-", "omni",

We cannot imagine the opposite of Existence

We can only imagine existing opposites

So we don't know what is is, because we don't know its real
opposite

Creation is waking to feel the makings of the world

Creation is coming into consciousness

" • the world coming into consciousness of itself

" • " • " • self-consciousness

" • self-consciousness

" • consciousness

" • sentence

Out-of-Creation is out-of-Consciousness
instead of waking, it is sleeping
(so define the world of dreams)
instead of life, it is death
(so define heaven & hell)
instead of this-worldly, it is other-worldly

but nowhere is it Void
Null
Zero
Nothing

↓
animal world?
spirit world?
myths world?
after-world?
time-slow-world?
Contrary-world

↙
these are, in truth,
half-hearted attempts

15. is redundant

it always carries the implicit ^{meaning} load of existence as well as similarity
and we don't know what existence means
we only know what similarity means
so we can easier make equations
than existential statements

Sunday Yesterday's 'species' of expressed or implied equations in the conceptual structure of Harada art

- 1) Balance-scale symbols (Box, soulcatcher, copper "bilateral symmetry")
- 2) Halves implying other halves (Parts: ovoid, "missing half")

3) Opposites in Balance Spoon, dagger

1+3 4) Four-square (front $\frac{\text{side}}{\text{side}}$ back)

36 5) Outside - inside 

6) Burning Fool (It is really its opposite) (Greening Bear)

7) Double-Bend (Tortured Witch)

16 8) Matched Pair, Twin

1+3 9) All Those That which is common to both (Copper)

10) Symbol Simple symbol of complex concept endow it with generability

11) Spirit endow it with personality

(Zooja)

- 1) Balance-scale
- 8) Matched pair
- 3) Opposites in balance
- 2) Halves implying other halves
- 4) Four-square
- 5) Outside-inside
- 9) All Those
- 6) Fool
- 7) Double bend
- 10) Symbol
- 11) Spirit

S
T
R
U
C
T

bilaterally symmetrical
Opposites in balance
Four-square

structural (analogy)
onomatopoeic (metaphors)

both ways of expressing equivalence
all are "created concepts"
which deal with equivalence

Is contain based on the verb carry?

Big raven carries man on his back

Man carries Raven on his head

" " Frog " shoulder

(∴ Frog carries Man in his empty bowl)

ie: "CONTAIN"

Raven contains Man

Man " Raven

and the opposite, Frog, (contains both, in his empty container)

Whatever else it might be, ^{NWC} art is a symbol of balanced ^{Harda} relationships. All art must exhibit ^{embody} or imply balanced relationships.
 (But some art is, just and simple, nothing more than, a symbol of balance in relationships):

- copper
- whatnot
- soul catcher
- CE box
- Calret
- (circle)

(Some parts carry the "necessary implication" of balance
 ovoid, hand, eye.

Monday

The general problem is putting 2 + 1 into reciprocal relations with each other and I have just explored the variations of ^{structured} balance-scale equations.

Now turning to the language of 2 persons in active reciprocal relations, the possibilities are narrow.

What verb to use? A while ago I came up with

"Carry"? ^{Latin: man-fero 3:} }
 are all looking for the same thing. }
 - eat
 - fuck
 - see } which tend to merge

"be (come)" - Angel & man? All but one present the artist with real problems, because people don't eat each other and it is hard to show them seeing each other (itself).

Hence the tendency to use the one most reciprocal of all mutual acts.

and to equate it with eating (Leach's Mother)
 seeing (eating eyes - on the my the)

Hence the similarity between:
 Raven Rattle
 Bear Mather
 Leechtronics
 Seehell Image

The art has to be reciprocal, mutual

"eat-spirit"

Friday:

Mask ↔ Mirror

For visual art, ---

the most important of the reciprocal-mutual-self active verbs is seeing:

self - recognizing - is self-seeing

(others:
 fucking } Least parameter
 eating }
 clapping } CE
 carrying }
 containing } bowl paradigm -
 entering }
 transforming } hawk etc "

- It and its alter ego carry -
 clasp each other
 top of CE period
 - 2 half-its transforming into
 each other
 - It contains its alter ego

but for seeing, what is the controlling visual image

mask? a contrived identity (an identity is a recognized image)
 an on-purpose identity
 what I want to be
choose

you see?

a deliberate redefinition of me
 (mask is a deliberate analogy
 exist " " " metaphor ?) let me explain
 let me show you

mirror? letting me see my identity
 what I really am
 an essential definition of me

I see
let me see

- 1) bilateral symmetry of - 2 eyes, same face
 maska frontlet etc etc - 2 profiles, same frontal
 - 4 eyed Gomagadit
- 2) face-seeing-itself-in-the-mirror (maska frontlet)
 [the paradigm of all frontlets?]
- 3) Matched pairs (Stone Masks)
 [redoubled to 4-face]

Both mask & mirror } are primarily associated with me
" identity

they both tell who I am.

my mirror tells me
my mask tells them

the mirror is the back side (my side) of the mask
the mask is what I see hidden behind the mirror

Frog is hiding behind the mirror
Frog is hiding " " mask (the "back side" of the mask
" face " " " "

Frog is the opposite

Frog tongue says the opposite

Frog ears hear " " "

Frog eyes say " " "

Frog got your tongue?
" " eye?
" " ear?

Frog "opening eyes" lets you
see the opposite

Frog is the "opposite sign" ($\frac{1}{2}$ of the equal-sign)

4) opposite of 2)

looking at one thing and seeing another
must be its opposite

looking at one thing and "seeing" the opposite

laven or
varicants
thereof,
like
Man
Frog

looking at the "^{very}mask" and "seeing" the "^{very}mirror"

↳ stone human
mask

(Frog)

at doesn't matter that they're in Ketkalla and Argeda. They
are the 2 torn halves of a dollar bill. They are both the
same: two Tuberas? 2 Weckerles? ^{round} loaves

- Coat and mask at the same time, a shared coat that is the
- mask and mirror very many of a mask

5) A "mirror-image" as a thing of the moment:

transient, impermanent, fleeting, dependent on my presence,
a child of the unforgiving moment

What art can do is photograph it (render it permanent)

- make permanent what I really see in the mirror

- " want to"

- " my metaphor

- " analogies

timeless moment

ART AS EQUATION

What is "the very image of a mirror"?
a slate mirror

Amhalait - does not hide the face
 - juxtaposes it with an image
 (its 'mirror image')

When you see me in my amhalait
 you are seeing me, and what I see in the mirror
 at the same time

you are seeing my mirror image, my mask
 what I see and "see" in my mirror
 my wedge and my mind
 what I want you to see "in me".

(Einstein's face & $E=mc^2$ in one)

$$\frac{1}{m} = c^2$$

"who I really am", my 'real self',
 you are really seeing me. The real me

Amhalait is the mask in the mirror ?

and . . . ?

5) Mirror: looking in and seeing an upside-down
 image. (Mighty Mouse)
 amounts to the same thing' as Frog ?

6) The 6-cut thing about the image of mirror is that it
 imposes - right-angles

- horizontality - verticality ^{water is the natural} mirror
 the horizon is ^{the} natural axis

to see yourself in it you must look straight down

Always conceive the 2-d field of art as the surface
of a mirror

your eyes are looking in, seeing something you recognize
you are looking in a mirror (to see your self)

" " " at something I have created

a mask I have made for you (for me)

a mask of that-which-is-common-to-both
an image we both can understand

Always conceive of the design as a mask, a shared mask
an image we both can understand

the design is the mask in the mirror

" " " you, and me, and 'that-which-is--both'
in the 'language' we both share

The field is the mirror, the design is the mask

The design is the mask in the mirror

The " " an image of what we share.

Which is the real mirror? Which the mask?

2 stone masks

AE's 4:4

"The opposite eye"

(would be frog's eye)

Which the mirror? Which the mask?

What is it that is common to both?

the "other" eye

otherwise

(halfness again)

6. (cont'd) What men can do is turn the axes 90°

make the horizontal axes vertical
stand it up on its end and look at it

(90° is better than upside down)
as an opposite.

it reverses upside down for the 5th opposite
- opposite to north-south-east-west (4-ups)

Men transpose the eye and the mirror

one eye, two images

the self-recognizing eye

my eye sees likeness

frags. " opposites

this eye sees - neither - both

- that which is common to both

AE's 4:4 as the self-seeing eye

CE, on Gowerstone, looked at with self-eating bird

(self-killing)
(-fucking)

} Skiamen

making: the self-eating eye

with 5 teeth

see
eat
kill
life
screw

because - there is still death

One who eats his own eye
That which eats its own eye
That " does the impossible Raven is Mr Impossible

Imagine him into existence and then tell a ^{true} story about him
" Master-Carpenter . . .
" Sins-sganagwai . . .

Raï - stints → that which is common to both
- kelst(ak) → " accomplishes the impossible

Summarize

- Express balance by ---
- 1) Flowing for balanced opposites
 - a) Structural ^{oppositions} paradigms 1-1
 - b) self-acts ^{reciprocal} 1-2-1

Raven, Mr Impossible, is the one who can do them.

{ Structural oppositions = (are equivalent to)
 self-reciprocal acts
 and Frog is the "opposite sign"

Impose balance (express balance)

June - Aug 74

Generic (human-condition) base

: Omnipotent - self infant - dream - schizophrenic fantasy
 : Recidual equation of eat - fuck - kill (oedipal theme) Universal taboos on sex, murder, cannibalism

a) not as always called upon to create the visual symbols that make up the culture
 b) show the diagrammatic relationships on terms of human relations
 a) involves interpersonal relations
 b) involves structure piece

Art is one of the ways of coming to terms with universal taboos. It provides the visual symbols which are the boundary markers:

- basic rules of society - who you screw
- social compacts - who you kill
- who you eat
- "facts of being human" - imagination, denial of death
- hunger, sex, affliction

- cognitive universals
 perception of balance 2 halves 1, 2, 4, 5, 8, 10

Culture-specific

Tell how they view the world
