Monday new findings yesterday:

- 1) 1-1 correspondences between 4 panels Raven Screen
4 sides of AE box

meaning:

- Screens are instructional panels, and box, when uncut, is
like a phallus with foreken back, is the key

- 2) Both have the structure of a myth as analyzed by S Herd
with the box as $f_{a-1}(y)$ for the screens
and " 4:4 " " " " " box
(that box has 5 sides)

- 3) The problem is the self-generation of Raven
opposites out of original unity
Raven giving birth to himself, and piercing the sky,
and bring the 2 things in the myth
It is the John Sky myth

- 4) CE dealt with some problem on Comport
and the Slate Chest

- 5) They are related to Kwata Frog mortar
and Edenshaw chief's seat.

The main business of NWC art was in a sense a
structural analysis of myth, especially the creation
myths involving Raven, and trying to find the $f_{a-1}(y)$
permutator. Trying to show how $e = mc^2$

$(c^2 = \frac{e}{m})$
