

How many are a few?

When you count to five on your fingers, which comes  
fifth?

Prepared is form without meaning (pipe w/o form)  
must become a field.

- must put on subjects and predicates (if meaning is to be conveyed)
- anyway, must put on predicates to hold subjects together.

Since you are putting on predicates, might as well choose what they are to mean

so that the answer is a generalization of attribute  
= crazy

You have a redundancy to work with, so why not make it a generalization?

- one pattern, another pattern, a third pattern → PATTERN
- on non act, " non-act, " " non-act → NONSENSE

H | Borogroves doing <sup>meta-</sup>sexual acts (Homosexuals?)

like sucking on a pipe

or. making a pipe that won't smoke?

W | White men doing nonsense acts

like smoking a pipe

Subject is not just W men,  
it is buoy W men  
just as the Harlequins had  
been (had to be) buoy
