

SMITHSONIAN INSTITUTION

WASHINGTON, D.C. 20560

6 May 69

Dear Wilson:

Many thanks--far better that it should be Edenshaw and of so much interest to you, than that it should be Alaskan and hence eligible for Osaka. Enclosed are some color slides for your files. Soon I'll send some more detailed black and white photos--our photo lab is slow, but good. I'll look into the Wm Gouverneur Morris Report, which sounds like exactly what we need to straighten out the records on the house front and several other pieces--many of them superb--we have from Swan/Centennial Exposition. I'll let you know how it turns out, and will incorporate your data with any further information, into our catalog.

While I wasn't so sophisticated about the overall control of space, I too was very pleased and intrigued by the interplay of overall bilateral symmetry and detailed differences of the two halves.

I do hope you can pay us a visit to work over our collections during your upcoming sabbatical. We have some great stuff here.

yrs

Bill

(PS - Saw Stanley & I are involved - as well as S. Riesenborg - with the Alaska totem pole project; don't hesitate to inquire if we can help.)
