

Story of q dy get

Ronald Mowatt
Jeffrey Johnson

June 1960

It could smell a man something like half a mile - it poked with nose, then ate men. After long time, was stalking a man. Person knew this animal chasing him, ran away. Came to a lake, couldn't go further. Climbed a tree, sat in tree. Late in fall, awful cold.

Animal didn't know where he went. Man's shadow of that man was in water. Animal saw it, jumped in, tried to grab it. He was in there for a while - but only a shadow was there.

Man in tree saw how the animal was chasing the shadow. He made a movement ^{like this} - animal saw shadow move, in water long time chasing shadow. Cold, came out, couldn't do anything. Man came down from tree, saw animal was going to die.

Man built a fire, burned that animal up. Before it was all burned up, and ashes flew - that's the mosquitoes. That's where mosquitoes come from. Before consumed, animal said "Even my ashes will " Last words he said: "Even my ashes the people will don't like" - will be disagreeable to people

Confusion between shadow and reflection

gans'odaxon

shadow

also

reflection

We didn't have a word for [mirror reflection]. "It is really a gansodaxon, it is your image in there."
